## We turn bathrooms into personal living spaces

We are Imex. We turn bathrooms into personal living spaces for everyone.

We believe that a liveable space is as unique as the individual who inhabits it. That's why we create customised design solutions that adapt to every lifestyle, celebrating the uniqueness of people and their environments. Just as every part of the world is shaped by the five natural elements—wood, fire, earth, metal, and water—these elements form the foundation of life, balance, and harmony.

Each person carries their own unique balance of these elements, and we embrace this individuality. We turn your bathroom into a sanctuary for relaxation and rejuvenation. Our designs are not just about functionality or aesthetics; they are about creating a space that uplifts your mind, body, and spirit, offering a retreat from the demands of everyday life.

At Imex, our mission is to help you design a bathroom that is more than just a room—it is a personal haven, a reflection of who you are, and a cornerstone of your wellbeing.

# Concealed cisterns & frames

## For wall hung pans

**10** year  
guarantee

Transform your bathroom into a sleek and modern oasis with a concealed cistern frame. By cleverly hiding the plumbing behind a wall, you achieve a minimalist aesthetic that enhances any design style, while also maximising space and creating a more open feel.

Concealed WC frames are perfect for wall hung pans and they offer both practicality and elegance in one intelligent design.

## For back to wall pans

With fewer visible fittings, your bathroom becomes easier to clean and maintain, promoting better hygiene. This versatile design also allows for customisation with various toilet styles and flush plate finishes available, ensuring your personal taste shines through.

Super slim concealed cisterns are an innovative solution for modern bathrooms. Designed for back to wall WC's, these ultra-thin cisterns are discreetly installed behind a wall or within a furniture unit, providing a seamless look that enhances the overall design of the bathroom.

## For back to wall pans

A concealed cistern with a pneumatic flush offers a sleek, modern, and highly efficient flushing solution for contemporary bathrooms. Designed to be hidden behind a wall or within a furniture unit, these cisterns contribute to a minimalist aesthetic while providing a smooth and effortless flushing experience through air-powered (pneumatic) technology.

### CIST-1

Shown with Croma WC unit.  
See page 93 for all colour options.

#### Pneumatic flush

Pressurised air activates the flush valve. The operation is generally quieter than mechanical flush buttons and requires minimal effort, beneficial for all ages and abilities

The cistern bodies are **fully insulated** to reduce risk of condensation inside the wall cavity.

Independent buttons for **full and eco flushes**. Flushes are adjustable as per below:  
Full: 4 - 6 litres  
Eco: 2.6 - 4 litres

**Ease of servicing**  
The cistern body features a large access cover. This can be quickly and easily removed without the need for tools, and providing a generous access for servicing and maintenance.
